🎯 Program Aim

Practical instruction in the Minimally Invasive Orthognathic Surgery technique, accompanied by comprehensive support throughout the clinical and surgical processes.

🏥 Surgeries Do you conduct surgeries? Yes. We facilitate a minimum of two orthognathic surgeries each week, with the possibility of additional procedures.
Will he undergo surgery?
Yes. The observer is encouraged to don surgical attire and enter the operating room for an enhanced perspective of the procedures.
✔️ Immediate postoperative management and follow-up ✔️ Comprehensive clinical routine with patients ✔️ Documentation, workflow, and planning of surgical procedures

⏳ Duration: 1 to 2 weeks, with flexible dates contingent upon surgical availability.Duration: 1 week USD 2,960 / 2 weeks USD 3,500 📜
1 month - Fee: $5,000 3 months - Fee: $9,000 6 months - Fee: $18,000

Certification: Certificate registered and issued by iBMF Courses

Fellowship

🎯 **Overview of the Fellowship Program**

The Fellowship is cultivated in collaboration with the surgical team at the Buccomaxillofacial Institute, involving active participation in all surgical procedures and the comprehensive clinical routine. The program encompasses:

✔️ Clinical assessments and postoperative evaluations ✔️ Clinical documentation (photography, image editing, and presentations) ✔️ Virtual planning, occlusal guides, cutting, and repositioning guides ✔️ Involvement in maxillofacial surgeries ✔️ Access to in-person, cadaveric, and online courses ✔️ Research initiatives and scientific publications ✔️ Opportunities for collaboration with other OMFS services in Brazil ⏳ Extended Fellowship Program
Duration: 12 months - 💰 Fee: $36,000
📜 Certificate: iBMF Courses in partnership with IEP – Teaching and Research Institute of Hospital Baía Sul

Mentorship

🎯 Program Aim

To provide comprehensive assistance to the surgeon in the virtual planning of Orthognathic Surgery, with strategic direction from the iBMF Courses team, from the initial analysis to the determination of the surgical sequence.

Surgeon Assistance

The surgeon overseeing the case will receive direct guidance from the iBMF team to:

✔️ Define the surgical type ✔️ Plan osseous movements ✔️ Select fixation strategies ✔️ Discuss possible intraoperative findings

🦷 Occlusal Indicators

✔️ Fabrication of intermediate and final occlusal guides ✔️ Transmission of the STL file for printing ✔️ Potential for planning cutting and positioning guides

📡 Video Conferencing

✔️ Videoconference meetings (Zoom) ✔️ Presentation of the virtual planning ✔️ Approval of the movements ✔️ Definition of the surgical sequence 📍 Fully online care, with tailored support based on the complexity of the case.

💰 USD 500 planning / Additional guide: USD 100

MentorshipExterno

Face-to-face mentoring in minimally invasive orthognathic surgery
🎯 Program objective: To provide in-person mentoring for the implementation of surgical plans within the surgical center, adhering to the minimally invasive orthognathic surgery protocol, with the active involvement of the iBMF Courses team.
In-Person Mentoring at the Surgical Center
✔️ Execution of the plans at the surgical center and within your city
✔️ On-site assistance adhering to the minimally invasive protocol
🏥 iBMF Team Performance ✔️ iBMF team involvement in surgical assistance
✔️ Collaborating with the surgeon overseeing the case
💻 Integrated Virtual Planning ✔️ Virtual planning conducted in collaboration with the iBMF team
✔️ Videoconference consultations for preoperative alignment ✔️ Formulation of the surgical strategy and sequence
📍 Location: Mentorship EXT occurs at the surgeon's surgical center, featuring both in-person support and virtual planning.
💰 - Solicit additional information

Mentoring - Exclusive

The program encompasses the complete orthognathic surgery process and incorporates clinical reasoning, clinic organization, virtual planning, surgical implementation, and critical evaluation. Its objective is to cultivate judgment, predictability, and confidence in managing individual cases.

DIAGNOSIS

A personal dialogue aimed at comprehending the surgeon's professional experiences, uncertainties, and aspirations for career advancement.

DECISION

Clinical reasoning to determine and define orthodontic timing, as well as to select movements based on criteria, safety, and predictability.

EXECUTION

Real-life surgical procedures involving the maxilla, mandible, and chin, accompanied by insights on minimally invasive techniques, potential complications, and aesthetic enhancements.

WORKFLOW

Comprehensive management of the patient journey: reception, consultation, examinations, planning, conclusion, surgery, and post-operative care.

PLANNING

Comprehensive digital workflow: DICOM and STL, composite cranium, movements, surgical templates, printing, and printer management.

DISCUSSION

Continuous case analysis, planning, intraoperative and postoperative evaluations, CT scans, and results to validate decisions and facilitate evolution.

SPECIAL MODULE | OBSERVERSHIP **A COMPREHENSIVE TRAINING**

A week of complete immersion in the clinic, observing consultations, planning, the operating room, and the actual workflow of the team. This is the moment when diagnosis, workflow, decision-making, planning, execution, and discussion converge in person.
